Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 29-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Schrijver et al (U.S.Pat. 6,542,220).

With respect to claim 29, Schrijver et al (figure 6) discloses an exposure apparatus comprising all basic features of the instant claim such as: a reticle stage (MT) holding a reticle (MA); a projection optical system (PL) for projecting a predetermined pattern formed on the reticle onto a wafer; and in the broadest sense, Schrijver et al discloses a plate (220) which can be regarded as “a reticle surface plate” disposed between the reticle and the projection optical system and which supports the reticle stage, “the reticle surface plate” (220) having an opening for transmitting exposure light and a “sheet glass” (see figure 6) set on the reticle surface plate so

as to separate a space inside the opening of the reticle plate from a space above “the reticle surface plate”

With respect to claim 30, the claimed method is seen to be inherent teaching in view of the existence of the above apparatus.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Henry V Nguyen whose telephone number is 571-272-2124. The examiner can normally be reached on Monday-Friday (First Friday off).
